A: Visit this link: Q: Nunit multiple tests within a test I'm trying to get an idea of how to structure Unit Tests when the tests are dependent on each other. I have two tests, each test calls the 'Given' method from the other. I want to test both tests together. This is the structure of the code so far: [Test] public void Process_Test() { Process process; int value; process = new Process(processName); if (process.Process(processName, out value)) {
