MusicControl is a multi-platform music player, player and MIDI controller. It features an intuitive interface that is easy to use, and can be used as a stand-alone music player. It features the ability to play many file formats including music files, MIDI files, Videos, Avi, Wma, Ogg, and other formats. MusicControl Description: MusicControl is a multi-platform music player, player and MIDI controller. It features an intuitive interface that is easy to use, and can be used as a stand-alone music player. It features the ability to play many file formats including music files, MIDI files, Videos, Avi, Wma, Ogg, and other formats. MusicControl can play music files in the following formats: WMA, MP3, WMA Lossless, OGG, AAC, FLAC, and APE, MIDI files (including MTP) with full track level editing, video files, and also embedded binaries. Control any MIDI instrument from MusicControl. You can use the mouse to move the cursor to a note, and with one click select that note and control the rest of the instrument. MusicControl can have several playlists that you can switch between. You can record directly from your audio interface, or from a microphone, line-in or midi device. The up to 16 tracks of the audio interface are represented in the built-in audio mixer. All tracks can be synchronized, for example, and you can control the pan of each track separately. You can also set a minimum volume of the tracks. You can create groups of MIDI instruments, run the computerized version of an expression controller, and mix the values of multiple MIDI instruments using a mini-joystick.
