05/2021View 47 more lines More columns (or more rows) can be in the list. How to determine how  
many rows are greater than columns for which there is no list? I know how to solve it for the first  
column because I can make a string: select count(\*) as count, max(id) from table where id in (select id  
from table where count >= 50) group by count If I had a table with 50 columns I would probably do  
something like:
