The Motion Capture technology authenticates and verifies all the player's actions and movements, providing an accurate movement on the pitch. Details on Player A.I., ball physics and mechanics and real player data have been published in "The FIFA Interactive World Cup." As with the previous game, you can customise the ball to reflect your own personal preference. Moving the goalposts in FIFA games is only a topic if the players know that the goalposts actually exist. Yes, the goalposts moved in FIFA 19 as it was, unlike the FIFA World Cup trophy which is static. Why do players use curved players in FIFA games? We've always had curves in FIFA.
