

Sony Acid Pro 7 Full Serial Keygen En Espaol !!BETTER!!

. Browsing "Download Acid Pro 7" to change the.Q: Getting json data to a web-page I have a page with a button (the button is added in the HTML code) and with javascript I'm trying to send the button's text to the server (via POST). It works when I test it in a standalone script, but when I test it in a DIV, the data won't appear in the POST request. The server side is a simple asp.net page. The javascript: function postToServer() { if (window.XMLHttpRequest) { // Mozilla, Safari,... xmlhttp = new XMLHttpRequest(); } else if (window.ActiveXObject) { // IE xmlhttp = new ActiveXObject("Microsoft.XMLHTTP"); } xmlhttp.open("POST", "", true); xmlhttp.setRequestHeader("Content-type","application/x-www-form-urlencoded"); xmlhttp.send("name=" + document.getElementById("test").value); } A: Ditch the form: function postToServer(e) { if (window.XMLHttpRequest) { // Mozilla, Safari,... xmlhttp = new XMLHttpRequest(); } else if (window.ActiveXObject) { // IE xmlhttp = new ActiveXObject("Microsoft.XMLHTTP"); } xmlhttp.open("POST", "", true); xmlhttp.setRequestHeader("Content-type", "application/x-www-form-urlencoded"); xmlhttp.send("name=" + document.getElementById("test").value); } Send Data Your input elements are not in the document, but are in the element. In order to get the element and its value the event needs to be passed in.
