Q: Unable to get text from tag with first child tag with XPath in Java How to get text from a block with XPath in Java? Here is my Java code: XPathExpression expr = XPathFactory.instance().compile("//*[@class="table"]"); NodeList nodes = (NodeList) expr.evaluate(doc.getElementsByTagName("tbody"), XPathConstants.NODESET); I tried to use.text,.getFirstChild.text and nothing returned anything. I'm using a DOM parser and that's the only way I know to access this text. Any suggestions? A: This works for me: NodeList nodeList = (NodeList) expr.evaluate(doc, XPathConstants.NODESET); System.out.println("Found text: " + nodeList.item(0).getTextContent()); A: To get the text, but using Js

The New Fantasy Action RPG is a simple and yet effective fantasy RPG that offers a high sense of
accomplishment while satisfying the needs of players who love to explore unknown areas and find
loot. The game supports a detailed character customization feature that lets you create a unique
character with a wide variety of equipment. In addition to the standard RPG gameplay, the game also
features various unique additions including the Online Element, a multiplayer mode, and an
asynchronous online element that allows you to feel the presence of other players. The sound effects
are simple and numerous, and fit the gameplay. The music has an elegant and appealing variety.

The background graphics feel clean and detailed, and the menus are clear and intuitive. The graphically complex movements of the characters and monsters feel smooth. The user interface is easy to understand, and the UI elements are easy to manage. The basic setting feels gloomy. However, the game includes light moments to make it more friendly. The bonus music and sound effect feature is surprisingly effective. The Graphics feel clear and detailed in parts but there are certain areas where the Graphics could have been better.
