It's a good way to see a complete listing of installed extensions, as well as the folders they appear in. If you're looking for new features, you can click on the three dots at the top of the address bar, then click on the "More tools" option. This will open another small drawer, which lets you change the size of the text, add new buttons, and toggle the dark/light theme. The Chrome developer tools are built into the browser itself.

Navigate to "More tools" then "Developer tools" to get started. The developer tools are mostly helpful for getting a deeper level of control over individual browsers. You can view which files are loaded on a page, or even use new Web standards that allow you to modify the code directly. You'll see the developer tools in action on the next page.
