
Hipath 3000 Manager E V9 20

May 6, 2017 - Hi, I have a problem with HiPath 3000 Manager V9. After entering the username & Password . Thanks for your reply and attention. My Windows 7 64 bit computer is running Windows 7 Pro. I can connect to the Internet using WLAN, but I cannot connect to the phone network on my computer using LAN or WLAN. I don't use any apps to manage my phone. I also use HiPath 3000 Manager V9 management software to set up and manage my phone. HiPath 3000 Manager V9 comes with two 1TB or 2TB drives.
