## Angels And Demons Subtitles English 720p ~REPACK~

the theatrical version runs about an hour longer than the hd disc, and features several exclusive featurettes that make up about an hour, all of which can be accessed from the menu. the new material includes a look at the costumes, the sets, and historical aspects of the production, along with an interview with screenwriter david koepp and co-screenwriter akiva goldsman. both movies feature the exact same picture quality, and i'm not sure why the extra material on the blu-ray was included unless it was a way to provide the new disc with a content boost. i can't say this for the remaining extras, as i didn't see anything new; but two of the new online features are left over from the dvd. the 'book it!' feature allows you to navigate through a book version of the movie as a fly-by, while you can watch previously-seen segments on certain subjects. the unconnected 'text of angels & demons' is an online version of the brief book discussion written by langdon (david niven) after receiving his grail revelation. as for the five supplements, they're as follows: thriller fans get a treat with this 4k edition, as it has been trimmed from the 2-hour and 53 minute theatrical cut (which is almost an hour shorter) and includes a chunk of footage that was deleted during the original theatrical run. the new disc also provides a few helpful extras that boost the film's video-based entertainment. animatic, creating the character of robert langdon, the making of angels & demons, documentaries, deleted scenes and storyboard: joseph o'brien, the vatican, the piazza navona, the tourist, rialto bridge, altar of light and prophecy, monastery of sant'angelo, cathedrals of the world, the palazzo vecchio, the sumptuous palazzo dei congressi. this supplementary material covers 14 of the film's most pivotal sequences in considerable detail, which also includes alternate camera angles and basic storyboards for the deleted scenes. the digi-pack also includes two featurettes - the cardinals - an interview with the members of the college of cardinals, and the pope - an interview with benedict xvi. the original theatrical version of the film, as it appeared in theaters, includes a few minutes of previously unseen footage on the disc.

## Angels And Demons Subtitles English 720p

'angels & demons' is an attempt to do what 'the da vinci code' succeeded in doing - make a bible-themed mystery fiction with enough cynical humor to make you laugh, tug your heartstrings, keep you coming back for more. with 'angels & demons' the movie proves that with every season comes a new foe for charles (tom hanks). lesser culprits of religious fanaticism remain a common threat, but when langdon and vetra discover an ancient code that predicts the future and unearths the whereabouts of the world's most notorious killers, charles must go up against forces far more diabolical than the catholic church. the new blu-ray transfer has the devils missing a few shots, with robert langdon and the rest of the cast choosing to duck behind cover when they should, rather than sticking their heads out and getting shot. but the film looks better than any previous release, yet there are still some

---

scattered areas that lack clarity. at times the picture breaks apart into unwanted fragments as the camera explores different angles and vantage points, resulting in some split screens and fish-eye effects. colors seem subdued when some of the greens pop out the most, and light scenes feature duller greens and blues. the image may not be as sharp as the previous dvd, but it's still more than adequate. blacks look robust, and image detail impresses, boasting noticeable contrast and a good amount of texture. video quality is the best it's been since the two-disc dvd release in 2009. the first disc offers both the theatrical version and an extended edition, along with a digital copy. anamorphic widescreen is used for both versions, which are presented in 1080i hd with a dts-hd master audio 5.1 surround track. the second disc offers a high-definition blu-ray with the same presentation.
